

Omar Farque

Web Developer | Sabre GDS Air Ticketing | Graphic Designer | Video Editor | Digital Marketer

B.Sc. Computer Science & Engineering

Dhaka, Bangladesh | +880 1705-182933 | umor2026@gmail.com

Portfolio: omaar-x.github.io | GitHub: github.com/omaar-x

Summary

Computer Science & Engineering graduate (B.Sc., July 2026, BUBT) who works where software meets real business operations. **Five paid client websites and web apps** built, deployed and maintained for real businesses, each with a public URL and public source. Worked in travel operations at Trip Fly BD from March to August 2026, booking air tickets on **Sabre GDS** and handling reservation support in Bangla and English. Research work in applied deep learning, with **one IEEE paper accepted** on brain tumour MRI classification and segmentation with explainable AI. Accurate under deadline, clear with customers, and quick on new systems.

Education

Bangladesh University of Business and Technology (BUBT)

B.Sc. in Computer Science & Engineering | CGPA 3.24 / 4.00 | Completed July 2026

Core coursework: data structures & algorithms, object-oriented programming, database systems, software engineering, computer networks, web technologies. English medium of instruction; transcripts on request.

Kharrah Adarsha Degree Honours College

Higher Secondary Certificate (Science) | GPA 4.58 / 5.00 | 2021

Churain Tarini Bama High School

Secondary School Certificate (Science) | GPA 4.17 / 5.00 | 2019

Experience

Travel Operations & Ticketing Assistant

Trip Fly BD — Travel Agency, Dhaka | Mar 2026 – Aug 2026 | tripflybd.com

- Issued and managed domestic and international air tickets end to end on **Sabre GDS** — fare display, reservation creation, reissue and booking updates.
- Owned each booking after it was made: itinerary changes, reservation queries and travel documentation, so no customer had to chase their own status.
- Resolved fare and schedule questions by phone, chat and in person in **Bangla and English**, converting enquiries into confirmed bookings.
- Identified that daily attendance was still tracked on paper and **built the Smart Attendance System** unprompted — a role-based web app now in daily use, replacing the manual register.
- Built and maintained the agency's website sections and landing pages in **HTML, CSS and JavaScript**, shipping changes without an outside vendor.

Independent Web Developer (Freelance)

Paid client projects — travel, real estate, consultancy, trading | Project-based, ongoing

- Delivered **five paid client websites and web apps**, every one still live in production with a public URL and public source.
- Took each project from requirements to launch as the **sole developer**: design, build, deployment, client handover and ongoing fixes.
- Built mobile-first, responsive, accessible layouts that stay usable on low-end Android devices.
- Structured pages for **SEO** — semantic markup, metadata, structured data, sitemaps.
- Replaced paid form services with a **Google Apps Script and Google Sheets** lead-capture backend, giving clients reliable enquiry handling at zero running cost.

Publications

TumorMultiNet: A Statistically Validated Hybrid Deep Learning Framework for Brain Tumor MRI Classification and Segmentation on BRISC2025 with Explainable AI

IEEE | Accepted

Hybrid deep learning framework for brain tumour MRI classification and segmentation, statistically validated on the BRISC2025 dataset, with explainable-AI interpretation of model decisions.

Smart IoT First Aid Box

In preparation

IoT-based first aid system for automated supply monitoring and emergency response support.

Projects

Trip Fly BD — Travel Agency Website

tripflybd.com | HTML, CSS, JavaScript, SEO

Customer-facing travel agency site: service positioning, consultation CTAs, trust-focused brand design.

Midtown Aabashon Ltd — Real Estate

midtownaabashonltd.com | Responsive UI, performance

Corporate property site with project discovery, responsive layout and high-intent contact paths.

Smart Attendance System — Trip Fly BD

omaar-x.github.io/Tripfly-Smart-Attendance-System | JavaScript, GitHub Pages

Internal web app for daily attendance operations: role-based sign-in and a fast, practical workflow.

Rover Consultancy

roverconsultancy.com | Business site, responsive UI

Consultancy site with focused service presentation and clean routes for client enquiries.

FMZ Trading Website

omaar-x.github.io/FMZ-Trading-Website-Main | HTML, CSS, GitHub Pages

Trading-focused site with a sharp visual system, responsive sections and a live deployment.

Skills

Travel Systems & Ticketing: Sabre GDS air ticket booking, fare display, reservation creation and updates, itinerary support, travel documentation, customer service in Bangla and English.

Web Development: HTML5, CSS3, JavaScript, responsive and mobile-first UI, accessible layouts, semantic markup, structured data, SEO, performance.

Programming: JavaScript and Python in production work; C, C++ and Java from university coursework and contests.

Machine Learning & Research: Deep learning for medical imaging, classification and segmentation, explainable AI, statistical validation, academic writing.

Tools & Platforms: Git, GitHub, GitHub Pages, Google Apps Script, Google Sheets, Microsoft Word, Microsoft Excel.

Creative: Video editing, Canva design, photography, presentation and marketing assets.

Achievements & Activities

- **BUBT ICPC 2025** and **BIUPC Programming Contest** — competitive programming participant.
- **BUBT Innovtex Hackathon** — event volunteer.
- **Five production deployments** — public URLs, verifiable at any time.
- **Certificate gallery** — scanned certificates viewable at omaar-x.github.io.

Languages

Bangla: Native | **English:** Professional working proficiency
